

Overview

Enrollees in the Jerry Bickel Race Car Performance Class, JB001 receive two days of intensive instruction in the latest drag race car chassis designs, fabrication techniques, and chassis adjustments. This program will help everyone from sportsman racers to seasoned drag racing professionals.

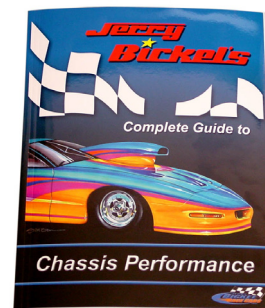

Sessions consist of group instruction, live demonstrations, and hands-on use of tubing benders, the shrinker-stretcher, and bead roller. This class was created in a joint effort by Jerry Bickel Race Cars, Inc. and RaceTech, Inc.

Instruction

We included the very best information from Jerry Bickel's staff of professional race car fabricators. The classes are taught by renowned race car builder Jerry Bickel, racing program author/teacher Robert Colesworthy, and Jerry's chief fabricators Bud Payton and Mike Meyer. These people build race cars for many high-profile professional racing teams as well as amateur racers. This is key, because students learn from those who actually do this kind of work for a living—Monday through Friday—and are recognized as leaders in their fields.

Program Features

- Group Lecture
- Jerry Bickel's Complete Guide to Chassis Performance Book
- Informational Handouts and Spec Sheets
- Race Car Chassis Theory
- Live Demonstrations of chassis fabrication techniques
- Live Demonstrations of chassis adjustments
- Hands-on practice

Time Schedule

Two-day class, 16 hours total, 9:00 am to 5:00 pm, Breakfast & Lunch included.

You Can Bring Your Own Car To Class!

If you own your own drag race car, you can bring it with you at no extra cost above the enrollment fee! Jerry will personally look it over and give you his suggestions. I feel this is worth the price of admission alone. We have received numerous calls & emails from those who implemented Jerry's suggestions after taking this class. All of them found immediate and substantial improvements in performance & consistency. Jerry also spotted a number of serious safety-related issues during his inspection. Just be sure to call us and let us know in advance if you'd like to take advantage of this offer.

Sincerely,

A handwritten signature in black ink that reads 'Robert L. Colesworthy'. The signature is fluid and cursive, written in a dark ink on a white background.

Robert L. Colesworthy
